What can agh3 do for you? Computer Support and Maintenance

agh3 can assist with any computer issues you might be having and also support Microsoft Office applications, Anti-Virus/Anti-Spyware, and all other applications. Network and Server Design

agh3 can help you determine just what your needs are and help you acquire, setup, and implement the correct solution. Microsoft Exchange and Sharepoint Server Administration

agh3 can plan, install, and manage your Microsoft Exchange and Sharepoint applications. agh3 Consulting also offers Hosted Exchange email accounts for small businesses that don't want the server and administration burden of running this inhouse. Hosted Exchange accounts allow a small business to connect their employees with email, shared calendars, and share document storage for a low monthly charge. Internet Connections agh3 can help you connect to the internet, register your domain, and manage your domain. Internet Security configurations agh3 has experience with many firewall options (SonicWall, Linux-based, and home solutions like Linksys, Netgear, Dlink and others). agh3 can configure your network and website to be secure, setup monitoring solutions and provide basic security testing. Web Site design & hosting

agh3 can work with you to develop a professional looking website that you can take over or contract for us to keep it updated. agh3 can also provide web hosting for small businesses. Email hosting

agh3 can offer you simple email services for your domain as well as complex email setups using Exchange 2007.

Lotus Domino Administration/Development agh3 can provide installation, configuration, administration, and development for your Lotus Domino infrastructure.
